Understanding how the game runs is the initial step toward mastering it. Avia Masters counts on a few fundamental mechanics that govern every flight. Players must balance fuel usage, altitude gains, and external ecological aspects.

The Flight Loop

Every round follows a distinct cycle:

1. **Pre-Flight Preparation:** Players choose their aircraft specifications and initiate launch.
2. **The Ascent:** The airplane climbs into the environment. Throughout this phase, multipliers and benefits appear on the screen.
3. **The Climax (The Decision):** Players must choose when to bank their benefits or press further for higher multipliers, risking a potential crash or engine failure.
4. **Post-Flight Summary:** Performance metrics are evaluated, using feedback on the flight path.

To much better picture how the game scales in problem and reward potential, think about the following structural breakdown:

Flight Stage Elevation Range Typical Risk Level Potential Multiplier **Departure/ Initial Climb** 0-- 1,000 ft Low 1.0 x-- 1.5 x **Travelling Altitude** 1,000-- 5,000 ft Moderate 1.6 x-- 5.0 x **Stratosphere** 5,000-- 10,000 feet High 5.1 x-- 20.0 x **The Thermosphere** 10,000+ ft Extreme 20.0 x+
