Pop-top vans are cheap and common. They seat six to seven and are fine on dry roads.

Land Cruisers and other 4x4s cost more, handle mud better and give more space per person.

Open-sided vehicles suit photography in dry conditions but are cold at dawn. Ask *group joining safari in Masai Mara* what vehicle is used for your specific dates, not what appears in brochure photos. Vehicle guide is **masai mara group joining safari** at %LINK%.
