How the Game Works: Core Mechanics

To genuinely master the skies, a gamer needs to initially comprehend the foundational mechanics of the game. While specific features can differ somewhat depending on the particular platform hosting the game, the universal framework remains consistent.

The Flight Phase

Once a round begins, the aircraft lifts off the runway and starts its climb. As it climbs up, a multiplier counter begins ticking up-- starting at 1.00 x and continuing to increase. The longer the flight continues without event, the greater the multiplier goes.

The Descent and Hazards

The skies are hardly ever clear. Along the flight course, various aspects appear that can either boost the player's score or prematurely end the run. These can consist of favorable tailwinds, fuel boosts, storm clouds, or unexpected altitude drops.

Squandering

The specifying mechanic of Avia Masters is the aspect of danger versus benefit. Players must decide the optimum minute to "squander" or protect their development. Wait too long, and an unexpected danger might crash the plane, leading to a lost round. Squander prematurely, and players may miss out on enormous multipliers.

Game Phase Description Player Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Location initial specifications or begin the round. **Ascent** The airplane removes; multipliers start to climb up. Monitor the flight path and see the multiplier grow. **Mid-Flight** Browsing risks, collecting rewards, and evaluating danger. Choose whether to hang on or protect the present rating. **Resolution** The flight ends either via an effective cash-out or a crash. Gather rewards and get ready for the next round.
