What is the Big Bass Crash Game?

In this format, players position a wager before a round begins. When the round starts, a visual graphic takes off-- in this case, the brave fisherman speeding throughout the water in his boat. As the boat travels further, an on-screen multiplier climbs up greater and higher, starting at 1.00 x and theoretically reaching infinity (though topped at a maximum win limitation).

The objective is easy: **money out before the boat crashes.**

If a player squanders successfully, their bet is increased by the existing cash-out value. If the boat crashes before they struck the button, the bet is lost. It is a game of high stress, split-second choices, and balancing greed against care.
