How the Game Works: Core Mechanics

To genuinely master the skies, a gamer should first understand the fundamental mechanics of the game. While specific functions can vary somewhat depending on the specific platform hosting the game, the universal structure stays consistent.

The Flight Phase

As soon as a round begins, the airplane raises off the runway and starts its climb. As it climbs up, a multiplier counter starts ticking up-- beginning at 1.00 x and continuing to rise. The longer the flight continues without event, the greater the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight path, various aspects appear that can either improve the player's rating or prematurely end the run. These can consist of favorable tailwinds, fuel boosts, storm clouds, or unexpected altitude drops.

Squandering

The defining mechanic of Avia Masters is the aspect of threat versus reward. Players should decide the optimal minute to "cash out" or protect their development. Wait too long, and an unexpected risk might crash the plane, leading to a lost round. Squander prematurely, and players may miss out on out on huge multipliers.

Game Phase Description Player Action **Pre-Flight** Setting stakes or preparing the aircraft for launch. Place initial criteria or start the round. **Ascent** The aircraft takes off; multipliers begin to climb up. Monitor the flight course and view the multiplier grow. **Mid-Flight** Browsing dangers, gathering perks, and examining risk. Decide whether to hold on or protect the current rating. **Resolution** The flight ends either via a successful cash-out or a crash. Gather benefits and get ready for the next round.
