2. Players position a bet before the round begins.
3. As the multiplier climbs, players should strike the **"Cash Out"** button.
4. If a player cashes out successfully, they win their preliminary stake multiplied by the current worth.
5. Nevertheless, the game can **"crash"** at any given minute-- even at 1.00 x. If the game crashes before a gamer squanders, their bet is lost.
