Card Source	Virtual (Random Number Generator)	Physical cards and standard shoes
Pacing	Managed entirely by the gamer	Controlled by the dealer and video game round limitations

Moreover, independent testing companies-- such as eCOGRA, iTech Labs, and GLI (Gaming Laboratories International)-- regularly audit live dealer studios. These auditors check the devices, confirm the precision of the OCR technology, and guarantee that the mathematical home edge functions exactly as planned over the long term.

3. Multiple Camera Angles and Complete Transparency

One of the greatest advantages of live blackjack is the complete exposure it offers. Players are not forced to blindly rely on a concealed algorithm.
