The objective is basic:

1. The player chooses a stake amount.
2. A ball (or disc) is dropped from the top of a triangular pyramid made from rows of pegs.
3. As the ball falls, it bounces randomly left and right off the pegs.
4. The ball eventually lands in among the slots at the bottom of the board, each bring a particular multiplier worth.
5. The gamer's payment is determined by multiplying their original bet by the worth of the slot where the ball lands.

Key Features of Online Plinko

Unlike the television variation where prizes are fixed, modern-day online Plinko permits players to customize their gameplay experience. Most platforms use numerous adjustable features:
