What is the Plinko Casino Game?

At its core, Plinko is a game defined by gravity and probability. Players drop a little disk (or ball) from the top of a pyramid-shaped board filled with a grid of pegs. As the disk falls, it bounces randomly off the pegs left and right till it finally lands in one of the slots at the bottom. Each slot corresponds to a specific multiplier.

If the disk lands in a high-multiplier slot, the player wins a considerable payment. If it lands in a low-multiplier slot, they may win less than their initial stake-- or potentially lose it.
