1. What Is the Mines Game?

Mines is a crash-style game where a player exists with a grid (most typically a 5×5 or 7×7 board) consisting of a concealed number of mines. The goal is to expose as numerous safe squares as possible before striking a mine. Each revealed safe square boosts a **multiplier**; the player can squander at any time to lock in their profits. If a mine is exposed, the entire stake is lost.

Crucial element of the game:

Element	Description
Grid Size	Typically 5×5 (25 cells) or 7×7 (49 cells).
Variety of Mines	Configurable from 1 approximately 24 (or more, depending on the platform).
Multiplier	Grows significantly with each safe cell exposed.
Auto-Cashout	Optional setting that instantly cashes out as soon as a target multiplier is reached.
RTP (Return to Player)	Typically ranges from 94% to 97% depending upon the operator and the number of mines chosen.

Since the result is identified by a random number generator (RNG), the game is transparent and fair-- provided you dip into a licensed casino.
