How the Game Works: Mechanics Explained

1. **The Launch:** Players place their stake before the round starts. When the countdown ends, the airplane takes off, and the multiplier starts at 1.00 x.
2. **The Ascent:** As the aircraft climbs, the multiplier boosts constantly. Along the flight path, various obstacles, fuel increases, or benefit zones may appear, depending upon the particular game version.
3. **The Cash-Out:** The primary objective is to hit the "Collect" or "Cash Out" button before the airplane crashes or vanishes off-screen. If effective, the initial stake is increased by the value displayed at the exact minute of withdrawal.
4. **The Crash:** If the aircraft fails before a cash-out occurs, the round ends in a loss, and the stake is forfeited.

To much better visualize how stakes scale with multipliers, consider the following theoretical payment table based upon a basic £ 10 entry stake:

Table 1: Payout Scaling Example (£ 10 Stake)

Multiplier Value Total Payout (Stake × Multiplier) Net Profit **1.50 x** £ 15.00 £ 5.00 **2.00 x** £ 20.00 £ 10.00 **5.00 x** £ 50.00 £ 40.00 **10.00 x** £ 100.00 £ 90.00 **50.00 x** £ 500.00 £ 490.00

Keep in mind: Higher multipliers use incredible returns, but the analytical possibility of the airplane reaching them reduces correspondingly.
