A CS2 case opening takes place when a gamer uses a virtual key-- purchased for £ 2.50 GBP in-game-- to unlock a weapon case dropped throughout gameplay or obtained through the Steam Community Market. As soon as opened, the case spins through a visual carousel before landing on a random item.

Why do countless players continue to open cases despite the low chances? Game designers utilize intermittent support schedules. The near-misses-- where the cursor stops just one millimeter past an unusual knife-- keep players convinced that the next case will be the big win.
