If you are looking for a website designer Montgomery TX businesses can work with face to face, it helps to keep things simple. You want a company that understands local service businesses, knows what turns a visit into a phone call, and can keep the site running without making you chase people down for every small update.

Scalable Websites is based in Montgomery, TX and works with contractors, home service companies, and local small businesses. It is a veteran-owned company founded in January 2025 by Preston Toor. While the business itself is new, the team brings 10+ years of experience and 200+ websites built for home service businesses.

This matters because contractor website design is not the same as building a general business site. A contractor usually needs calls, form leads, review visibility, and a site that works well on a phone. That is the foundation here.

Built for contractors and local service businesses

A lot of small business website design looks fine at a glance, but misses the practical pieces that help a service-area company do business. For contractors and home service companies, the website needs to support how customers actually reach out.

Every site from Scalable Websites includes mobile-first design, click-to-call, Google reviews shown on the site, custom lead forms with instant text and email alerts, on-page SEO from day one, and hosting and security. Those are useful basics for companies that depend on calls and lead forms, not just page views.

The company builds and manages custom web design, custom WordPress websites, website redesign, and website maintenance. It works with trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and 30+ more.

For a business owner in Montgomery or nearby areas, that focus can make the process more straightforward. Instead of explaining how your trade works from scratch, you are working with a team already familiar with home service businesses.

Local service and practical support

For many owners, local access still matters. Scalable Websites is a service-area business, not a walk-in office, and meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

That local footprint makes sense for companies searching for web design Montgomery TX or web design The Woodlands support. If you want to sit down and talk through a new site, a website redesign, or ongoing website maintenance, in-person meetings are part of how the company works.

Hours are Monday to Friday, 8 AM to 5 PM. The business also holds a 5.0-star Google rating, which can give some added confidence when you are choosing a partner to manage an important part of your business.

Plans that cover different stages of growth

Not every business needs the same size website on day one. Some need a clean single-page site to get started. Others need more service pages, better follow-up tools, and room for ongoing content.

Scalable Websites offers three plan options:

- Starter, $95 a month for a single-page site
- Growth, $195 a month for 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console and Google Analytics
- AI Enhanced, $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations

Every plan comes with a 6-month minimum, then month-to-month. There is also a 30-day money-back guarantee on signup. After 36 months, the client owns the site, and there is a free design refresh every 36 months.

That structure can be a smart fit for local businesses that want a clear monthly option instead of a confusing custom quote for every detail. It also helps to know what is included from the start.

Ongoing website maintenance that is actually useful

A website is not a one-time project for most service businesses. Pages need updates. Security needs attention. Backups need to happen whether anyone remembers them or not.

scalablewebsites.com contractor website design montgomery tx

That is where website maintenance becomes a real value, not just a line item. Scalable Websites includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a busy contractor, that can remove a lot of friction.

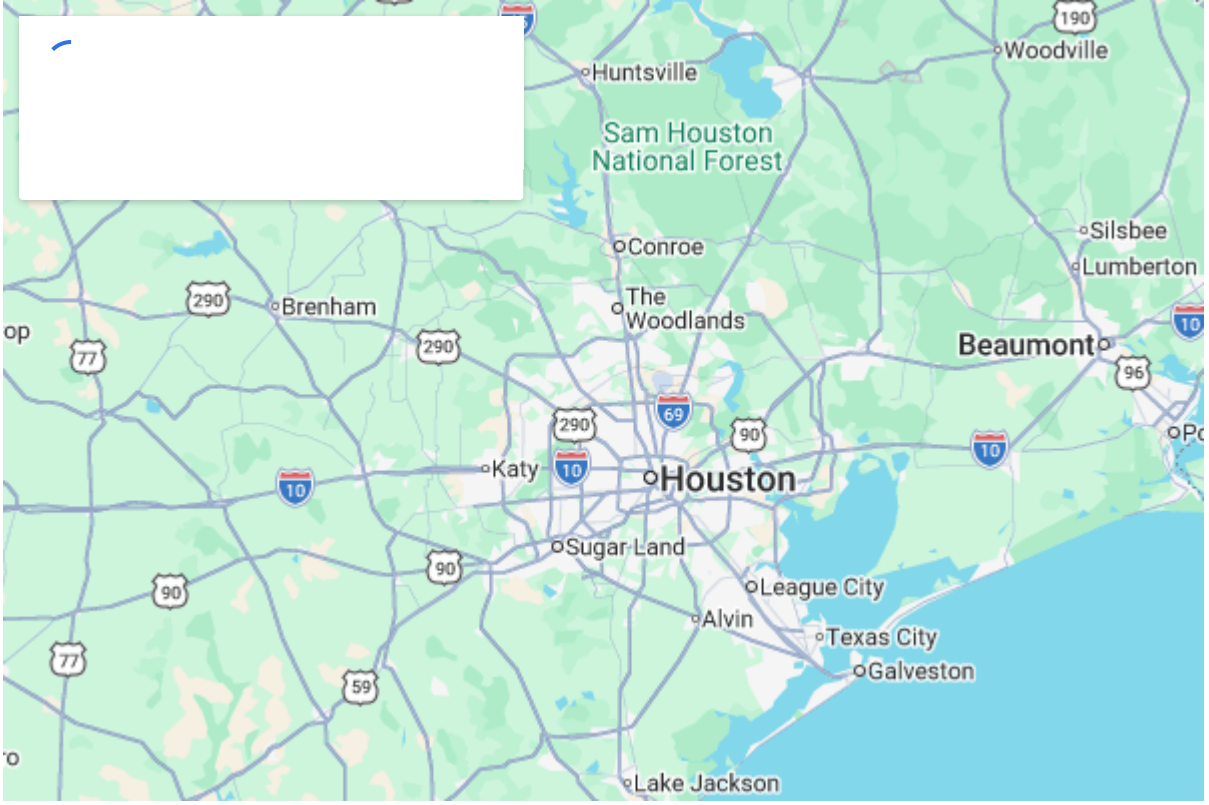

Instead of wondering who to call every time you need a service area changed, new photos added, or site issues checked, you have a setup built for ongoing support. That can be especially helpful for companies that do not have an in-house person managing the site.

For businesses comparing contractor website design options in Montgomery and nearby communities, the practical question is simple. Does the company understand local service businesses, and can it build a site that helps people call, message, and request service without extra hassle? Based on the services offered, the local meeting area, and the support built into the plans, this is why Scalable Websites stands out as a smart fit for many of those needs.
