If the horizontal line in the Top Slot lines up a bet with a multiplier, that multiplier uses to that specific outcome for the upcoming spin. If the primary wheel arrive on that result, any wins for that round are boosted by the multiplier. If a bonus offer round is activated with a Top Slot multiplier connected, the beginning multipliers inside the reward game are instantly increased by that figure.

Diving Into the Four Bonus Rounds

The true heart of Crazy Time depends on its four perk video games. Activating one of these rounds transports players from the primary studio into a special enhanced reality mini-game.

1. Coin Flip

The most basic of the bonus rounds. A coin with a red side and a blue side is flipped by a mechanical arm.

- Before the flip, random multipliers are assigned to both the red and blue sides.
- Whichever side lands face up wins the multiplier for the taking part players.
- If the multipliers are low, a "Rescue Flip" can often be activated, providing players another possibility at higher benefits.

2. Money Hunt

This perk game includes a huge screen showing 108 random multipliers hidden behind shooting gallery symbols (like a cactus, a target, or a duck).

- Gamers use an on-screen crosshair to intend and contend one sign before the timer goes out.
- Once time expires, all signs reveal their surprise multipliers, and the player gets the multiplier behind their chosen target. Every player gets to select their own spot, meaning various gamers can win different quantities.

3. Pachinko

Inspired by the conventional Japanese arcade game, Pachinko features a glowing, vertical board filled with physical pegs.

- The host drops a puck from the top of the board.
- The puck bounces randomly down through the pegs till it lands in among the multiplier zones at the bottom.
- If the puck lands on a "**Double**" value, all multipliers at the bottom of the board double, and the puck is dropped again, leading to potentially huge payments.

4. Crazy Time

The supreme bonus round takes gamers behind a red door into a surreal, whimsical virtual world including a massive, 64-segment wheel.

- Players should choose one of 3 flappers: **Green, Blue, or Yellow**.
- The host spins the giant wheel.
- Whichever section the selected flapper points to when the wheel stops is the reward granted.
- The wheel consists of **"Double"** and **"Triple"** sections. If a flapper arrive on among these, all multipliers on the wheel double or triple, and the wheel is spun once again. This is where the game's legendary 20,000 x max multiplier can be attained.

Popular Playing Approaches
