Some players increase their base bet after a streak of non-Double results (psychology-based "hot-hand" approach).Statistically irrelevant in seclusion, however can marginally improve ROI when integrated with a dynamic bet-sizing algorithm. **Bankroll Segmentation**Divide the total bankroll into three "pockets": (i) Regular play, (ii) Bonus-focused, (iii) High-variance "all-in" for Crazy Time only.Makes it possible for disciplined threat management, preventing a single unfortunate streak from cleaning out the entire bankroll. **Timing the Host's "Big-Spin" Cue**The host occasionally signifies a "big spin" (e.g., by stating "Alright, let's get crazy!") which historically accompanies a somewhat greater incidence of perk hits (≈ 0.5% boost).Exploiting this pattern can improve hit possibility, though it is not guaranteed and ought to be used sparingly.
