- *Example:* If Player A wins with **Rock**, Player B (the loser) is unlikely to throw Rock (repeating) or Paper (which beats Rock). Therefore, Player B is statistically probably to toss **Scissors** in the next round. To capitalize on this, Player A must toss **Rock** again.

3. Psychological Warfare (Mind Games)

- **Verbal Priming:** Mentioning a shape out loud frequently unconsciously drives the challenger to play something else-- or requires them to overthink and play the specific thing you pointed out.
- **Inform:** Just like in poker, RPS gamers often display micro-expressions, muscle tensions in the forearm, or doubt that offers away their upcoming toss.
