2. Negligible Transaction Fees

High gas costs on Ethereum have actually often priced daily players out of decentralized betting. Even small bets could sustain fees that exceeded the potential earnings. Solana solves this by keeping transaction fees at a fraction of a cent (usually around £ 0.00025 per deal). This makes micro-transactions and regular betting entirely practical.

3. Provably Fair Gaming

Lots of Solana-based gambling establishments utilize wise agreements to guarantee fairness. "Provably fair" algorithms enable players to independently verify the result of every spin, card deal, or dice roll utilizing cryptographic hashes. This eliminates the "house benefit" of covert adjustments, providing complete transparency.
