The Core Betting Options

When players prepare to **wager Crazy Time**, they have 8 unique betting spots on the virtual grid. Gamers can select to bet on numbers, benefit games, or a combination of both.

- **Number Bets (1, 2, 5, 10):** These are the most regular hits on the wheel. Betting on '1' offers the lowest payout but the highest possibility of winning, functioning as a conservative option. Betting on '10' offers a higher payment but appears much less regularly.
- **Reward Game Bets (Coin Flip, Cash Hunt, Pachinko, Crazy Time):** These bets do not pay straight on the base video game. Rather, putting a wager on these areas grants the player entry into the interactive reward round if the wheel arrive at that particular segment.

The Top Slot Multiplier

Contributing to the excitement of every spin is the **Top Slot**, a two-reel mini fruit machine placed directly above the primary cash wheel.

Before the wheel is spun, the Top Slot spins concurrently. It produces a random multiplier and assigns it to one of the wheel sectors (either a number or a bonus offer game). If the primary wheel arrive at the matching sector *and* a multiplier is connected, any win resulting from that spin is multiplied appropriately.

- Multipliers can vary from 2x up to a shocking 50x in the base video game.
- In the *Crazy Time* bonus offer round, multipliers can rise to 20,000 x, which is where the video game's huge optimum payments originate from.
