2. **Conversion:** The platform values the deposited skins (normally based upon third-party market pricing) and credits the user's account with on-site balance, coins, or credits.
3. **Wagering:** Users play various casino games utilizing their balance.
4. **Withdrawal:** If a player wins, they use their balance to acquire different (and ideally better) skins from the platform's store, which are then traded back to their Steam inventory.
