If the main wheel lands on the precise matching segment, the payout for that number or the multiplier for that reward round is improved accordingly. This is where enormous payouts can start to form before players even reach a bonus offer round.

The Four Extravagant Bonus Rounds

The real heart and soul of Crazy Time are its 4 perk rounds. These mini-games transport gamers away from the main wheel and into immersive, computer-generated benefit environments.

1. Coin Flip

- **How it works:** A coin with a red side and a blue side is placed in a mechanical flipper. Each side is assigned a random multiplier before the flip.

- **The Outcome:** Players are given a brief countdown to goal and fire an on-screen cannon at a sign of their option. When the timer ends, all symbols reveal their hidden multipliers, and the gamer wins whatever value lagged their chosen target.

3. Pachinko

Motivated by the standard Japanese arcade video game, the Pachinko benefit round is everything about gravity and thriller.

- **How it works:** The presenter climbs to a platform and drops a puck down a big board filled with physical pegs. At the bottom of the board are different multiplier values, alongside a "DOUBLE" zone.
- **The Outcome:** The puck bounces down the board and lands in among the multiplier slots. If it lands on "DOUBLE," all multipliers at the bottom of the board double in worth, and the presenter drops the puck a second time. This can repeat until the maximum multiplier limit is reached.

4. Crazy Time

The holy grail of the video game, Crazy Time takes gamers behind a huge red door into a surreal, Alice-in-Wonderland-style virtual world.

- **How it works:** Players are faced with a huge virtual wheel including 64 segments filled with big multipliers and "DOUBLE" or "TRIPLE" wedges. Before the wheel spins, players should select one of 3 flippers (Green, Blue, or Yellow).
- **The Outcome:** The presenter presses a big red button to spin the wheel. Whichever section lines up with the player's chosen flipper determines their prize. If the wheel arrive at "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins again. This process can duplicate, possibly causing the video game's optimum advertised payment of 20,000 x the bet.
