Seeing a cockroach scatter when the kitchen light comes on is enough to make anyone pick up the phone. In the Roanoke Valley the usual culprits are German cockroaches, which live indoors near kitchens and bathrooms, and larger American and smoky brown cockroaches, which often come in from mulch beds, crawl spaces and storm drains during humid weather. Perdue Exterminators handles all of them as part of its cockroach extermination service.

The species matters because each one calls for a different approach. German cockroaches breed quickly https://ameblo.jp/beaubaqv715/entry-12985256973.html and hide in tight, warm spaces like behind refrigerators, under sinks and inside cabinet hinges. A small infestation can become a large one in a matter of weeks. Outdoor species tend to wander inside looking for moisture, so sealing entry points and treating around the foundation makes a bigger difference with them. Perdue's insect identification service means the treatment matches the roach you actually have.

Apartments, duplexes and older multi family buildings in Roanoke can be especially tricky, because roaches travel through shared walls, plumbing chases and electrical runs. Treating a single unit sometimes only pushes them next door. Landlords and property managers benefit from working with a company that understands how these buildings are put together and can coordinate treatment across units.

Perdue Exterminators | 4323 Old Cave Spring Rd, Roanoke, VA 24018 | (540) 989-8188

Cutting Off What Roaches Need

Professional treatment works best when the home stops feeding the problem. Fix dripping faucets, store dry goods in sealed containers, take trash out nightly and avoid leaving pet food out overnight. Cardboard boxes from deliveries and grocery stores can carry German cockroach egg cases, so break them down and recycle them quickly. Perdue's technicians will point out specific conditions in your home that are helping roaches survive.

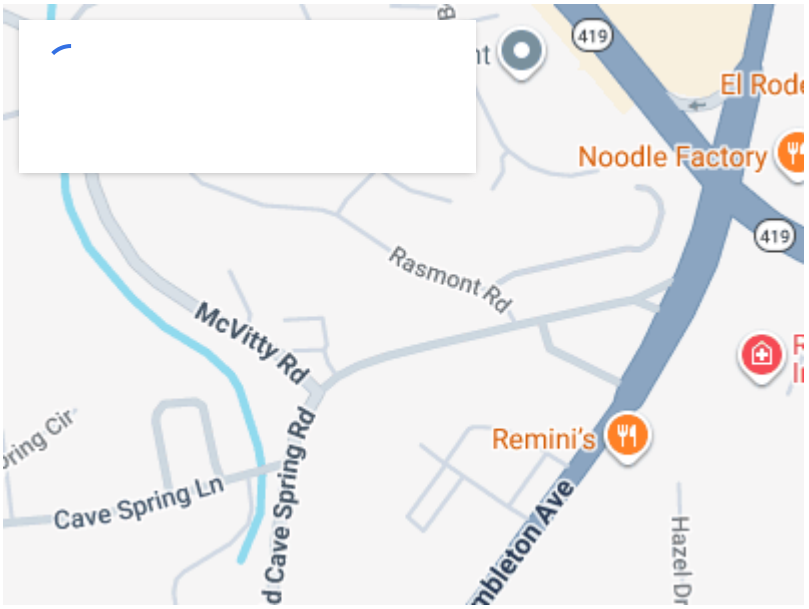

Commercial kitchens, convenience stores and break rooms face the same pressures on a larger scale. Perdue Exterminators offers commercial pest control as well as residential service, so a restaurant owner on Williamson Road or a small office in downtown Roanoke can get the same experienced technicians who treat local homes. Regular service keeps a minor roach sighting from turning into a failed inspection or a bad online review. The company has been working in Roanoke Valley buildings of every age since 1969, which helps when a roach problem is coming from somewhere unexpected.

For cockroach control in Roanoke, Salem, Vinton or the wider Roanoke Valley, call Perdue Exterminators at (540) 989-8188. The family owned company has served Southwest Virginia since 1969 from 4323 Old Cave Spring Rd, and it offers residential and commercial pest control solutions.

FAQ About Pest Control Company Roanoke

How do I choose a pest control company in Roanoke?

Look for licensed exterminators, a long local track record and a company that inspects before it treats. Perdue Exterminators has served the Roanoke Valley since 1969, is still family owned and keeps a small team of long serving technicians who inspect each home's environment and construction before recommending treatment. Call (540) 989-8188 to talk it through.

How much does pest control cost in Roanoke, VA?

Cost depends on the pest, the size of the home and how established the problem is, so an inspection gives the most accurate answer. Perdue Exterminators offers free estimates on termite work and a free inspection and consultation for bed bugs, and the company lists reasonable rates among its priorities. Call (540) 989-8188 for a quote.

Are termites common in Roanoke, Virginia?

Yes. Eastern subterranean termites live in the soil across the Roanoke Valley, and humid summers, clay soil and damp crawl spaces give them ideal conditions. Swarms usually appear on warm spring days after rain. Perdue Exterminators has treated termites in local homes for more than five decades.

Do termite treatments come with a warranty?

At Perdue Exterminators, termite elimination comes with renewable annual warranties. Renewing each year keeps a professional inspecting the home and keeps protection in place, which suits a region where termite pressure returns every season. A documented warranty can also help when you sell your Roanoke home.

How can I tell if I have bed bugs?

Common signs are itchy bites in lines or clusters, small dark spots on sheets and mattress seams, and tiny reddish brown insects around the bed frame or headboard. Because other insects look similar, Perdue Exterminators starts every bed bug case in Roanoke, Salem and Vinton with a free inspection and consultation to confirm the problem first.

Can mice be removed without using poison?

Yes. Perdue Exterminators describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. Technicians also find and seal entry points such as gaps around utility lines and crawl space vents. The company advises calling as soon as you notice rodents, before they multiply.

When is pest season in Roanoke?

Pests are active most of the year in the Roanoke Valley, just in different forms. Spring brings termite swarms and ants, summer brings wasps, crickets and roaches, and fall brings mice and overwintering insects as nights cool. Year round service from Perdue Exterminators is timed around those seasonal shifts.

Do I need a termite inspection to buy a house in Virginia?

Many lenders ask for a wood destroying insect report, and most buyers want one either way. Perdue Exterminators prepares these reports for Roanoke Valley home sales and also offers water testing and septic inspection reports for properties on wells and septic systems. Call (540) 989-8188 to schedule before your closing deadline.

What areas does Perdue Exterminators serve?

Perdue Exterminators serves all areas of Roanoke, Salem, Vinton, Smith Mountain Lake and the surrounding communities. The office is at 4323 Old Cave Spring Rd in the Cave Spring area of southwest Roanoke County, where the family has been based since the early 1980s.

Why are there so many crickets in my basement?

Camel crickets thrive in damp basements and crawl spaces, which are common in older Roanoke homes with stone or block foundations. Reducing moisture with a dehumidifier and repaired gutters helps a great deal. Perdue Exterminators provides cricket extermination and also helps eliminate and control crawl space mold caused by the same dampness.

Is a local pest control company better than a national chain?

A local company usually means familiar technicians, a local office that answers the phone and real knowledge of area housing and pest patterns. Perdue Exterminators has a technician who has been with the company since 1980, and its motto is large enough to serve you, but small enough to know you.

How long has Perdue Exterminators been in business?

S.G. Perdue founded the company in 1969, starting out of his house and the trunk of his car. His son Andre later joined the business, and today it is led by owner and President Jeff Hudson. It remains a family owned pest control company serving Roanoke.
