How CS: GO Case Battles Work

1. **Setup**-- A player develops a battle lobby or joins an existing one. The lobby specifies the number of cases, the specific case types, and the number of participants (most frequently 1v1, 2v2, or 3v3).
2. **Synchronized Opening**-- Once the battle begins, every participant opens the identical sequence of cases at the exact same time. The system records the market worth of each skin gotten.
3. **Worth Calculation**-- The total worth of skins each player gets is summarized, using the present Steam Community Market rates.
4. **Winner Determination**-- The gamer with the greatest aggregate worth wins the pot, which is usually the amount of all skins collected by both sides (minus a home edge).
5. **Payout**-- Winning skins are transferred directly to the winner's Steam inventory, while losing participants receive nothing (aside from any alleviation items, if the platform provides them).
