Some players increase their base bet after a streak of non-Double results (psychology-based "hot-hand" technique).Statistically irrelevant in seclusion, however can marginally enhance ROI when combined with a vibrant bet-sizing algorithm. **Bankroll Segmentation**Divide the overall bankroll into 3 "pockets": (i) Regular play, (ii) Bonus-focused, (iii) High-variance "all-in" for Crazy Time only.Makes it possible for disciplined risk management, avoiding a single unfortunate streak from cleaning out the entire bankroll. **Timing the Host's "Big-Spin" Cue**The host periodically signifies a "big spin" (e.g., by stating "Alright, let's get crazy!") which traditionally corresponds with a slightly higher incidence of benefit hits (≈ 0.5% increase).Exploiting this pattern can improve hit probability, though it is not ensured and need to be used moderately.
