The gamer exists with a grid of surprise tiles. Below these tiles lie either multipliers (gems, gold, or signs) or "mines" (bombs, skulls, or traps).

When a player chooses a tile, they either expose a benefit-- which increases their existing payouts-- or trigger a mine, which results in the loss of the existing stake. ### 3. Escalating Tension

The "Stop or Go" mechanic is a timeless mental hook. As the potential jackpots climb, the internal pressure to stop grows along with the greed to reach just one more multiplier. This produces a state of "circulation" where the gamer is psychologically locked into the grid.
